「HIGH DEFINITION」
BROWS

It's much more than just eyebrow shaping ...

Whoever you are, whatever the state of your eyebrows, HD Brows puts celebrity beauty within your reach.

Eyebrows are as individual as fingerprints. HD Brows is a high-precision procedure that transforms even the most over plucked eyebrow into its perfect shape, dramatically enhancing your facial features.

Taking between 30–45 minutes, the treatment consists of seven unique procedures that are performed by your highly trained and skilled HD Brows stylist. These techniques include a unique combination of threading, waxing, tweezing, tinting and shaping to achieve the perfect eyebrow shape, colour and definition. Our expert stylists assess the shape of your face and colouring before creating a bespoke brow, tailored exclusively for you.

We are the only salon in Witney to be able to offer you treatments with Pro and Master High Definition Stylists. This is a reflection of the level of knowledge, experience and skill our therapists have.

Full range of award winning high definition brow products are available to purchase.

FAQs:

Q. Will I get the result I want straight away?

A. Most people get the HD Brows look immediately. However it will sometimes take a few visits to achieve the perfect HD Brow look.

Q. I have over plucked my brows, can I still have HD Brows?

A. Yes, we can put you on a regrowth programme that will train your brows into shape over a course of visits. To speed up your growth between visits there are HD Brows products that will help stimulate growth and make your eyebrows appear fuller and defined.

Q. Will I need a patch test?

A. Yes, patch tests are required for all tinting, HD and LVL treatments at least 48 hours prior to your first treatment. This is still required whether you have or not had these treatments previously at another salon. A new patch test is required if it's been six months or more since your last treatment.

Pre and post treatment care:

In the days leading up to and following your HD Brows treatment we recommend:

Avoiding exfoliating (both acid exfoliators and scrubs) and anti-ageing products (especially if they include retinol) around the brow area for a minimum of 3 days either side of your appointment

Avoiding fake tanning products (including gradual tan) on the face for three days either side of your treatment

If you have HD Sculpt it is crucial you avoid getting the area wet for 24 hours

Avoiding contact with direct sunlight, sunbeds, saunas, steam rooms and swimming pools for the next 48 hours

Avoiding excessive rubbing or touching of the treated area for 24 hours
